ANGELA AGOR :

As you know, knowledge is far more valuable when shared. Thus teaching is especially important as it imparts knowledge to others. I can still clearly remember that I started enjoying “teaching” at a young age. After I had learned something new, I was always itching to share my new discovery with my little companions. While growing up as a high school student, an undergraduate, a graduate, and even a post-graduate. I have always admired those school teachers and university professors who excelled at conveying their knowledge unto me. Now teaching the children here at Al Khaleej experiences I hope to inspire those young and fresh minds too.
